INTERNSHIP WEEKLY REPORT

WEEK – 1 (From Dt 08-05-23 to Dt 13-05-23)

Roll Number: 20711A05C6   Year/Sem: III-II

Name of the student: P.V. Abhi Rama Sarma

Objective of the Activity Done:
Detailed Report:
HTML (Hyper Text Markup Language) is the code that is used to structure
a web page and its content. For example, content could be structured within a set of paragraphs,
a list of bulleted points, or using images and data tables
Use of Html: 1. web pages development
2.Web document Creation
3. Internet navigation
4.Cutting edge feature
Cascading Style Sheets (CSS) is a style sheet language used for describing the presentation of a document written in a markup language such as HTML or XML (including XML dialects such as SVC , MathML or XHTML).
CSS is a cornerstone technology ofthe World Wide Web, alongside HTML and JavaScript
Syntax to link css in html is link sheet" href="style.css"
Uses OF CSS:
1.Solves a big problem like text, colour, etc
2.Saves a lot of time within External attributed
3. Provide more attributes
4.Pages load faster
5. Easier Website maintenance

JavaScript is a scripting language that enables you to create dynamically updating content, control multimedia, animate images, and pretty much everything else
Use of Java Script:
1.Easy to create web pages dynamically
2.Used for presentations
3. Web server apps
4.Games
5. Mobile applications
Bootstrap is a free, open source front-end development framework for the creation of websites and web apps. Designed to enable responsive development of mobile-first websites, Bootstrap provides a collection of syntax for template designs.
Use of boot strap:
1.Makes responsive web design for reality
2.Easier to use
3.Easy to prevent among multiple projects
4.Allows entrepreneur to fully focus on the key aspects
5.Majory designed for mobile applications
